

## Touch Up the Finish on Cabinetry (With or without Glaze)

### Tools and Supplies

Kit includes one or more of the following:

- Filler stick
- Stain Marker or Paint Touch-up Pen
- Glaze Touch-up Pen (if applicable)

You may also need the following:

- Plastic card (an old credit card will be fine)
- Clean, dry, soft cloth (good quality paper towels work well)
- Rubbing Alcohol

### Repair a Dent or Chip with a Fill Stick

1. Wipe the damaged surface with the clean, dry, soft cloth to remove all dust.
2. Rub the filler stick over the dent (use it like a child's crayon).
3. Wipe off the excess filler with the clean cloth.
  - You may also wrap the cloth around the old credit card and scrape the cloth-covered edge over the dent. This helps keep filler in shallow dents. (photo a, at right)
4. Repeat Steps 2 and 3 until the repair is smooth and level with the rest of the surface.

### Touch-Up a Scratch, Rub Mark or Dull Area: Stain Touch-up Marker

1. Wipe the damaged surface with the clean, dry, soft cloth to remove all dust.
2. Move the marker lightly in the direction of the repair:
  - **Scratch:** Move in the direction of the scratch (photo b, right)
  - **Rubbed/Dull area:** Move in the direction of the wood grain.
3. Remove excess stain by quickly wiping the area.
  - Use a clean, dry, soft cloth.
4. Repeat Steps 2 and 3 until you achieve the desired color. If color is too dark, dampen a clean a cloth with rubbing alcohol and wipe the area. This will remove most of the color
5. Blend color by gently rubbing the area with a dry, soft cloth.

**Several light coats are better than one heavy coat.**

## **Touch-Up a Scratch, Rub Mark or Dull Area: Paint Touch-Up Pen**

---

1. Wipe dust off of the area to be repaired.
2. Shake pen well.
3. Point the pen tip up and press the tip down (photo d).
4. Turn pen over and press tip onto a piece of scrap cardboard (photo e).
5. Apply a light coat of paint in the direction of the repair.
  - **Scratch:** Move in the direction of the scratch
  - **Rubbed/Dull area:** Move in the direction of the wood grain.
6. Allow paint to dry.
7. Repeat Step 4 until you achieve the desired coverage.
  - If paint is too thick, dampen a clean cloth with rubbing alcohol and wipe the area. This will remove most of the paint and you can start again.
8. Blend texture by gently rubbing the area with a dry, soft cloth.

**Several light coats are better than one heavy coat.**

## **Touch-Up a Scratch, Rub Mark or Dull Area: Glaze Touch-Up Pen**

---

1. **Repair the Stain or Paint color first!** (Allow to completely dry.)
2. Ensure area to be repaired is still dust free.
3. Shake pen well.
4. Point the pen tip up and press the tip down.
5. Turn pen over and press tip onto a piece of scrap cardboard.
6. Apply a light coat of glaze in the direction of the repair.
  - **Scratch:** Move in the direction of the scratch
  - **Rubbed/Dull area:** Move in the direction of the wood grain.
7. Allow glaze to dry.
8. Repeat Step 4 until you achieve the desired coverage.
  - If paint is too thick, dampen a clean cloth with rubbing alcohol and wipe the area. This will remove most of the paint and you can start again.
9. Blend texture by gently rubbing the area with a dry, soft cloth.

**Several light coats are better than one heavy coat.**
